Mentor Information

Join our team as a Hackathon Mentor and be at the forefront of change in humanitarian innovation. You will:

- Meet new and likeminded people in the industry.
- See what's innovating a whole new generation.

We are looking for **TEAM MENTORS**. You will work between 2 – 4 teams and will assist your teams in navigating the Hackathon, along with challenging their creative thinking and ideation.

Our Team Mentors will be our participant's buddies throughout the Hackathon - supporting with practical project management advice and teamwork tips. They will assist in prompting team conversations towards understanding a specific problem or opportunity and keeping the team on-track and motivated to reach the submission finish-line.

These highly-organised humans will help teams reach key milestones and overcome any logistical challenges. They are also invited to assist in our Preliminary Judging round on Sunday.

Commitment

In the lead up to the event, there will be a Mentor Onboarding Zoom meeting.

The Mentors don't need to be available 100% of the Hackathon, but they should ensure they communicate their availability to their teams and stay connected.

Technology

All mentors are invited to attend the Hackathon either in-person at The University of Sydney or online. To support communication across the entire event, **Slack** will be the main engagement channel. The [HIA website](#) is also a key source of information.
